

Ben (Emilio) Ojemann

| Santa Barbara, CA | (206) 678-2630 | beojemann@ucsb.edu | LinkedIn: www.linkedin.com/in/beojemann |

PROFESSIONAL SUMMARY:

Hydrology and Physical Geography double major with strong GIS, remote sensing, and field research training. Experienced with spatial analysis, environmental data processing, and scientific communication. Proficient in ArcGIS, RStudio, Python, and Google Earth Engine. Strong background in field-based soil assessment, water quality monitoring, wetland restoration, and ecological research. Eager to apply my technical and field expertise to environmental projects.

EDUCATION:

University of California, Santa Barbara (UCSB)

Expected graduation: June 2027

Bachelor of Science (B.S.), Hydrologic Sciences & Policy

Bachelor of Science (B.S.), Physical Geography

Major GPA: 3.85 | Cumulative GPA: 3.5

Relevant Coursework: Environmental Water Quality; Groundwater Hydrology; Soil Genesis and Morphology; GIS Applications and Design; Technical GIS; Remote Sensing of the Environment I-II-III; Statistics for Environmental Science

RELEVANT EXPERIENCE:

Student Research Lead, Cheadle Center for Biodiversity and Ecological Restoration

Santa Barbara, CA

Sept 2025-Present

- Designed and currently executing research investigating the spatial relationships between waterbirds, aquatic invertebrates, and tides in a local, actively-restoring wetland to inform future management practices
- Conduct GIS-based spatial analysis in ArcGIS and RStudio to analyze and visualize ecological patterns across the wetland
- Presented written and visual results at the UCSB Undergraduate Research and Creative Activities (URCA) poster colloquium in May 2026
- Train and supervise 3 lab interns in field sampling, invertebrate identification, and data entry protocol

Lab Intern, Cheadle Center for Biodiversity and Ecological Restoration

Santa Barbara, CA

June-Sept 2025

- Supported ongoing wetland restoration efforts through systematic field data collection and validation
- Collected and organized water quality data (DO, pH, salinity, temperature) and aquatic invertebrate samples, contributing to long-term environmental monitoring datasets
- Documented field sampling and data collection procedures to ensure consistency and reproducibility across wetland monitoring sites
- Processed and identified 300+ aquatic invertebrate samples, contributing to ecological datasets used in ongoing research at the Cheadle Center

Fields Studies Student, UCSB Geography

Santa Barbara, CA

Sept 2025-Present

- Conduct field-based soil pedon assessments to describe physical, chemical, and biological characteristics for analysis and reporting
- Apply standardized classification methods (NRCS soil taxonomy, texture-by-feel, Munsell color charts)
- Record field data following structured protocols to ensure consistency among sampling sites

- Produce technical reports integrating field data with local hydrologic and geomorphic context to assess environmental conditions, strengthening applied scientific writing skills
- Praised for patience and willingness to take on multiple tasks to ensure smooth work flow, especially during long or pre-dawn working hours

WORK & LEADERSHIP EXPERIENCE:

Adventure Programs Staff, UCSB Department of Recreation,
Santa Barbara, CA

Apr 2024-June 2025

- Led informative kayak tours along the Santa Barbara coastline; facilitated rock-climbing events; and co-led weekend trips to Joshua Tree and the Colorado River, for groups of 15+ participants
- Completed 15-week Leadership Training Course emphasizing risk management, outdoor leadership, and team organization
- Conducted routine risk assessments and maintained safety compliance during outdoor programs and trips

Site Manager, Pedalheads Bike Camps
Seattle, WA

June-Sept 2024

- Managed safe operations of weekly bike camps serving 25+ campers and 5 instructors
- Praised for utilizing clear communication to successfully mediate parent concerns
- Maintained high-rating customer reviews for the entirety of the summer camp season
- Conducted employee performance evaluations

Captain, Men's Club Ultimate Frisbee at UCSB
Santa Barbara, CA

June 2024-Present

- Lead a 30-member competitive team, with an emphasis in accountability, communication, and cohesiveness
- Coordinate logistics for travel, lodging, scheduling and competition at regional-level tournaments

SKILLS:

GIS & Remote Sensing: ArcGIS Pro; ArcGIS Online; Google Earth Engine; ENVI

Programming & Data: RStudio; Python; basic DBMS concepts; Microsoft Office products; Adobe products

Field and Environmental: Water quality monitoring (DO, pH, salinity, temperature); soil description (NRCS standards) and classification (USDA taxonomy); bioassessment; environmental sampling protocols

CERTIFICATIONS:

Wilderness First Responder: Expires 2027

FieldFutures Training: To prevent/address sexual harassment and assault in field work settings

SmithSystem Driving: Defensive driving course for operating fleet vans
